- 21 character, 6 line programmable receipt message.
- Food stamp sorting and tendering/gallonage calculations.
- Programmable management controls.
- Validation.

For fast food outlets, snack bars, cafeterias, food concessions, ice cream stands, bars, convenience stores and more... the affordable Samsung ER-5100 provides the gateway to system features with standard RS-232C communications.

One-Touch Pricing

Simple one-touch pricing assures speed and accuracy. A large capacity keyboard lets you preset up to 117 items. In addition you can use the versatile level shift function for small, medium and large items, or breakfast, lunch and dinner menus.

1000 Price Look-Ups

The ER-5100 offers 1000 PLUs with 12 character alpha descriptors as a standard feature. Track fast moving items with preset PLUs or report additional product breakdowns by entering sales into open price PLUs. PLUs have extensive programmability including inventory. Plus, PLU to PLU linking may be implemented to add bottle deposits automatically.

21 Department Group Totals

Conveniently divide your PLUs into 21 major group categories (such as food drinks, soft-serve, etc.). An item's sales can be reported to two different sales groups simultaneously. This allows, for example, sales reporting by department and sub-department. One glance at your group report will keep you informed—without requiring a time consuming analysis of your PLU reports.

Convenience and Accuracy

Quickly and efficiently deal with mistakes and overings. Use the void function to correct items, or use the cancel key to abort any in-progress transaction. The key controlled transaction void function allows you to re-enter and correct any transaction after finalization.

Eat-In, Take-Out, Drive-Thru

Separate eat-in and take-out keys provide sales breakdowns. If you have different tax rules for eat-in and take-out food, these keys may be programmed to calculate or exempt the correct taxes automatically.

5 One-Touch Macro Keys

Macros can be used to perform up to 50 steps automatically for one-touch preset tender keys or other programmable functions.

Hourly Sales Data

The Samsung ER-5100 provides information to help you plan for busy and slow periods. Sales by hour reporting details customer counts and sales activity for each hour of the day.

Security and Management Control

Programmable options let you enforce the appropriate level of security for your business. Among many options, you can control coupons, discounts, voids, refunds, cancels and negative sales. Plus, the ER-5100 provides strict cash control with enforced closed drawer.
